

Ultracell Battery 12V / 9.0Ah, UPS (UL9-12)

Šifra: 35711

Kategorija proizvoda: UPS I PRENAPONSKE ZAŠTITE

Proizvođač: ULTRACELL

Cena: 2.960,00 rsd

Model Number: UL9-12

Ultracell Lead Battery 12 Volt 8.6 Ah

VRLA lead battery

Maintenance-free

Closed construction for optimal safety

Faston 187 connectors

12 volts

Capacity 8.6 Ah

life cycle 200 cycles - 1200 cycles (depending on discharge)

Type Ultracell UL9-12 General purpose

Maximum charge current 2.55 A

Housing: ABS

L: 15.1 cm

B: 6.5 cm

H: 9.35 cm

Weight: 2.45 kg

Note:

Do not discharge batteries deeply. The emptier they get, the faster they deteriorate. Preferably charge 6V batteries before they drop below 6V and 12V before they drop below 12V. Deep cycles can be discharged a little further, 5.8V and 11.6V. Recharge a battery as soon as possible if it starts to become noticeably less full.

Store batteries full.

If they are not used for a longer period of time, disconnect at least one pole from the battery so that they do not discharge through the device and recharge them after half a year and charge them before use.
