### Harmoničan dizajn

MOMI sinks are the essence of minimalism, elegance and functionality. Aimed at anyone who appreciates not only style, but also harmony and lightness. Despite the simplicity of the form, every element has been thought through to meet the highest standards of usability.

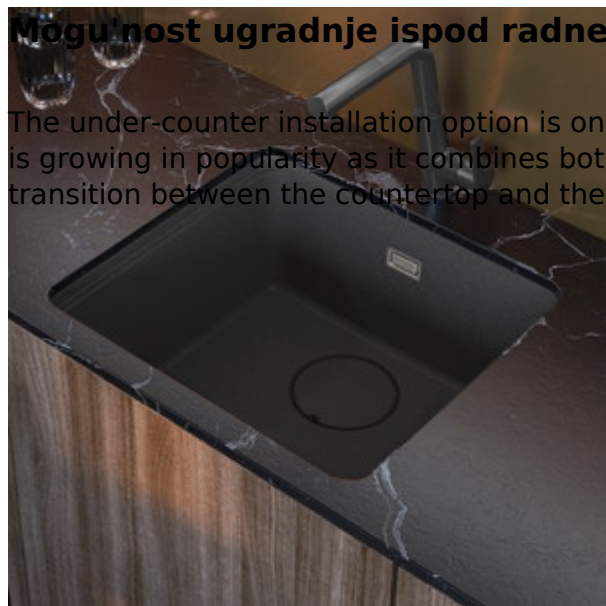

## **Duboko korito**

Despite maintaining the same external dimensions, our MOMI sinks offer a surprising capacity, thus becoming a master of practicality in your kitchen. They easily accommodate large pots or baking oven trays, offering invaluable space that translates into comfort and freedom of action.

## **Mogućnost ugradnje ispod radne ploče**

The under-counter installation option is one of the key features of the MOMI sink collection. It is a trend that is growing in popularity as it combines both aesthetics and functionality. Under-mounting creates a smooth transition between the countertop and the sink, which adds a modern and stylish look to the kitchen.

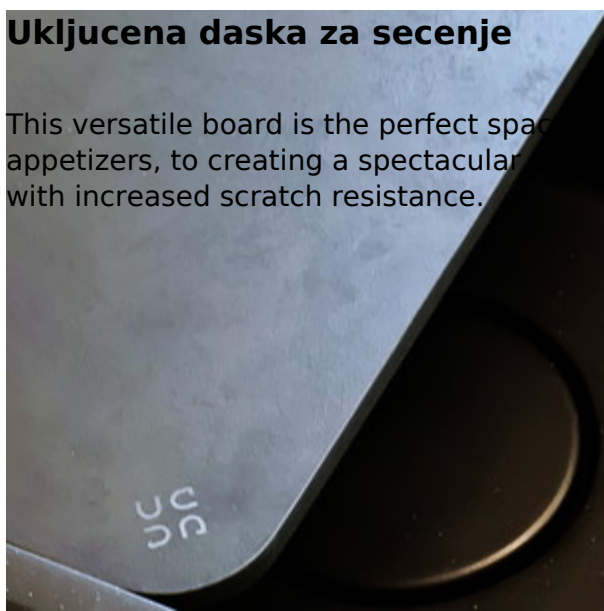

## **Granitni pokrivac odvoda**

Made of the same material as the sink, it fits perfectly, creating a coherent and harmonious whole. This small detail significantly enhances the aesthetics of the kitchen, creating an atmosphere of refined elegance. The cover works with the automatic plug function.

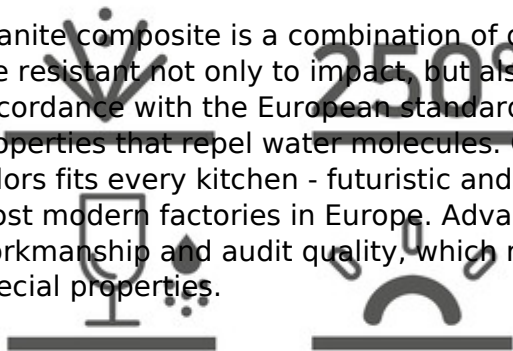

## Uključena daska za secenje

This versatile board is the perfect space for preparing meals - from cutting vegetables, through serving appetizers, to creating a spectacular display point for your culinary creations. It is made of HPL material with increased scratch resistance.

## Karakteristike Deante granita: Otpornost na udarce, visoke temperature, promene boje, termalne šokove

Granite composite is a combination of quartz sand and resins in ideal proportions. Thanks to this our sinks are resistant not only to impact, but also to high temperature (250°C), discoloration and thermal shock - in accordance with the European standard PN-EN 13310. They do not take odors and have hydrophobic properties that repel water molecules. Granite is noble and timeless, and thanks to the a wide range of colors fits every kitchen - futuristic and classical. Deante granite sinks are produced in Poland, in one of the most modern factories in Europe. Advanced production technology enables of the highest standards of workmanship and audit quality, which results in not only beautiful appearance of the product, but also its special properties.

## Hidrofobne karakteristike odbijaju molekule vode

Hydrophobicity is one of the natural features of granite, very useful in the kitchen. The surface of the sink repels drops of water, therefore the drops freely flow taking dirt particles with them. All of this makes keeping clean much simpler and no requires scrubbing or use of specialized chemicals.

## Space-saving sifon

The sink was equipped with innovative "Space Saver" siphon. If you've been|annoyed|annoyed by} pipes and elbows taking up most of the space in your cabinet, this is the solution for you. Special and telescopic design allows you to adjust shape of the siphon to your needs. Thanks to this, it is easy to find much more space in the cabinet for example for homemade preserves or bins for waste segregation. It is also possible to connect a washing machine or dishwasher to the siphon. And most importantly - you get the siphon in set!
